Serial No. 09/533,547

CI

## Amendments to the Specification:

Please replace the paragraph beginning at page <u>28</u>, line <u>25</u>, which starts with "As in examples 5 and 6" with the following amended paragraph:

As in Examples 5 and 6, a separate aliquot of blood was obtained from the donor when the study sample was taken. A complete hemogram was performed on this baseline sample. As the study samples were re-concentrated to 33-50% of their original state, direct eaparisons [should this be "comparisons"?] comparisons of a number of specific parameters would be possible with the baseline sample.
